

## Internal Audit Assessment Record

Internal audits of records, systems, policies, procedures and processes (systems and processes) help to identify issues or inconsistencies, address risks and highlight areas for improvement.

**The template below has been developed to provide an example of what an audit of an organisational system or process could look like.** The structure of the tool supports system audits in response to:

- A cyclical review
- An issue or risk
- Another business need which has presented

It provides one possible structure to gather evidence and identify an action plan for improvement.

Other templates in this series include:

- Employee file audit
- Participant file audit
- Internal audit organisational schedule

**The tools in this series are starting point, are general in nature and aimed to assist providers in developing their own systems. It does not account for the individual nature and risks of all NDIS services.**

For more information on Internal Audits see [NDS Organisational Internal Audits Factsheet](#).
